The Groundswell Profiles invite Kentuckians in every school district to join in a groundswell of education action. They rest on two deep convictions:

- Education can be the pathway to a larger life for Kentucky’s people
- A groundswell of public engagement can build a pathway wide enough for all to flourish

This profile offers a beginning overview of how education is working in a district, showing:

- Indicators of learning in progress, from preschool enrollment to degree attainment
- Indicators of different impact on different student groups
- Indicators of community well-being affected by education successes and challenges
- A brief display of school district enrollment and resources

This profile is, of course, only a beginning. In fuller exploration, you may want to explore many different features of your community’s landscape, from the quality of early childhood learning through student exploration about civics or science or teamwork or problem-solving and on to career and technical skills opportunities beyond high school.

Some of what you will want to know will not be included in these numbers. For example, problem-solving skills, teamwork, and arts performance are not easily shown in charts and tables. For some aspects of learning and engagement, you may want to seek other, more local evidence of work underway in your schools. You may also want to ask about "profile of a graduate" work in your district, focused on building capacities for every learner.

The best uses of this information will come from generating questions, seeking additional understanding, and helping your community come together. If we build a groundswell of public action, we can develop each learner’s unique strengths and open a pathway to a larger life for all.
These ten indicators track local learning opportunities and outcomes. Progress on each one can build toward success on later ones and support movement on the pathway to a larger life.

Each indicator shows the most recent data available. There’s additional information on each data point in our Study and Source Guide, available at prichardcommittee.org/2022Profiles.
Creating schools where all students can flourish will be an important part of building success for our communities! These seven indicators show results by student groups, each showing the most recent data released by the Kentucky Department of Education.

If a group has missing data points, that means the Department has not released those results, usually as part of policy designed to protect the privacy of individual students.

### OPPORTUNITY FOR ALL STUDENTS REQUIRES A COMMUNITY GROUNDSWELL

When communities, families, and schools work together, learning can take off. Your community may already have work underway, including schools with Family Friendly Certification and recognized Groundswell Actions.

Visit prichardcommittee.org/groundswellinitiative or contact us at groundswell@prichardcommittee.org to learn about those efforts and find other resources for use in local action.
